

PARTNER COLLABORATION

Keep track of operations throughout your partner network

YOUR CHALLENGES

A staggeringly low percentage of companies know exactly what is happening at each stage of their supply chain network. When manufacturing, packaging, and distribution activities are outsourced to third parties, a company can quickly lose oversight of these activities.

This problem becomes even more complex for businesses that rely on hundreds of global partners to produce, package, and distribute their goods. Without full visibility of supply chain operations, it is difficult to pinpoint and resolve issues and inefficiencies relating to quality, shortages, scheduling, inventory, sustainability, and more. On top of this, meeting ESG targets is near-on impossible without proper monitoring in place.

94%

of companies do not have full visibility across their supply chain networks.

OUR SOLUTION

With Partner Collaboration, we have developed a collaborative ecosystem for connecting all your global supply chain partners in real time. The cloud-based solution integrates seamlessly with your ERP landscape, providing powerful insights into what is happening with all of your partners at every stage of the supply chain.

Designed to provide you with a high level of data granularity at item level, you can maximize the opportunities to optimize your supply chain operations. Partner Collaboration not only gives you total visibility of your entire partner network; it also gives you the tools and information you need to take a proactive response to managing disruption by identifying and addressing any issues – even before they occur.

- **Infinite integration**

Integrate an unlimited number of suppliers, contract manufacturers, logistics partners, third-party packagers, warehouses, and distributors via the collaboration solution.

- **Real-time view of inventory and processes**

Get an accurate overview of all supply chain activities, from product development, open orders, and work in progress to inventory levels, quarantined materials, and logistics.

- **Key performance metrics**

Monitor performance through analytics and dashboards to increase productivity, quality, safety, efficiency, and profitability across your supply chain.

- **Tailored collaboration workflow**

Customize the collaboration workflow to your exact needs, and benefit from automated, digitized processes for fast onboarding of new suppliers.

- **Partner updates**

Communicate consistent information, such as product and shipping documentation, to all of your partners at the click of a button.

YOUR BENEFITS

By deploying the Partner Collaboration solution within your business, you can rely on our rich expertise and realize numerous benefits.

- Fewer production delays**
by tracking products and progress with all your partners 24/7
- Greater flexibility, agility & resistance**
to quickly identify and resolve issues in the partner network
- Lower risk in the supply chain**
due to streamlined inventory management and process visibility
- More satisfied customers**
thanks to increased shipment accuracy and on-time deliveries

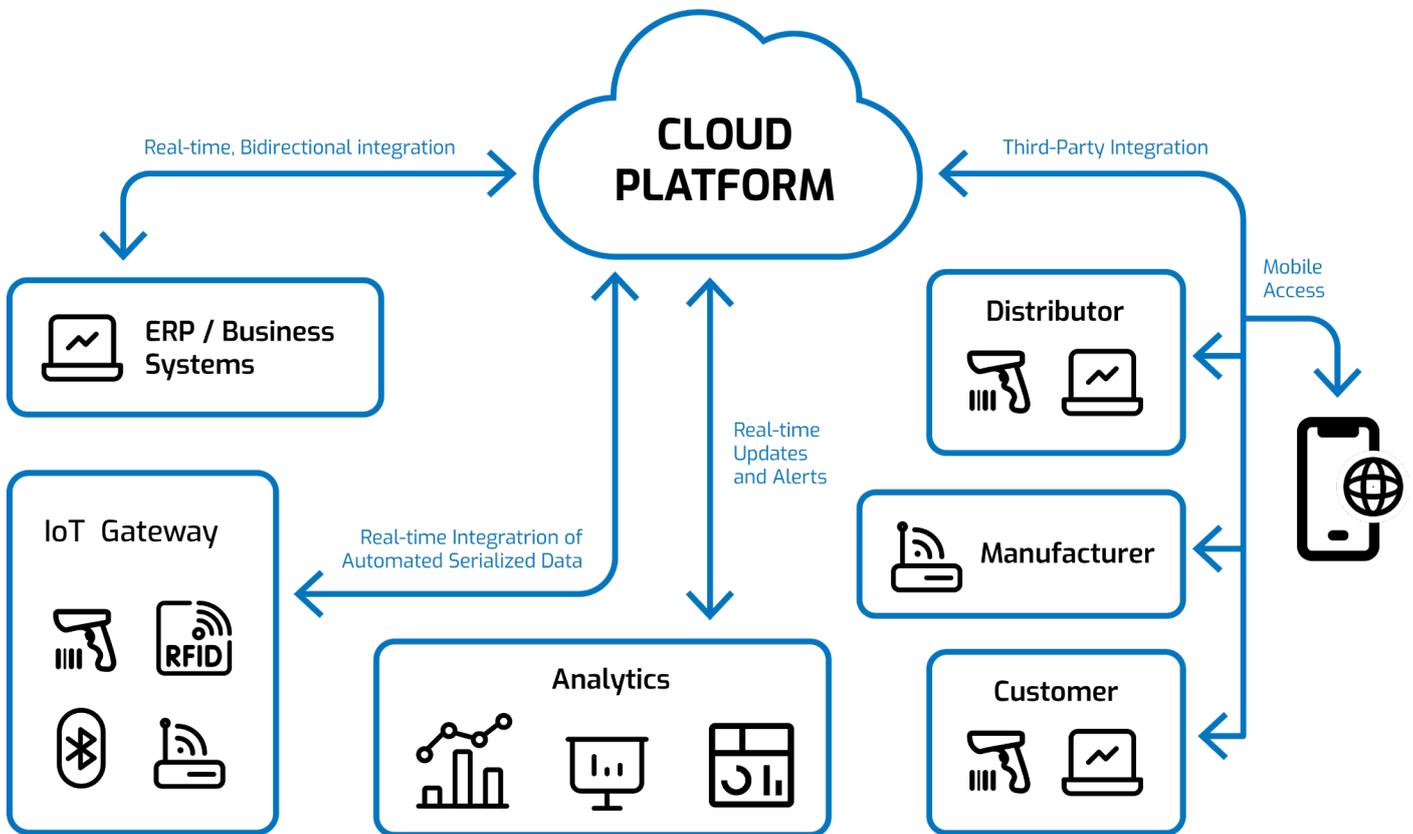

“Because we can better manage our partners and capture global supply chain data with the ACSIS technology, our division is able to realize the full benefits of end-to-end visibility and control of the supply chain.”

HOW IT WORKS

Our solutions are powered by our cloud platform, providing a complete real-time view of your extended supply chain. The platform integrates enterprise systems with any data collection device – from barcodes and RFID to IoT devices and more. Built-in analytics, machine learning, and AI deliver real-time data insights, driving transformational efficiencies at every step in the supply chain.

WHY US?

- 25+ years of industry experience
- Deep technology and domain expertise
- Proven experts in supply chain visibility
- Trusted partner of Fortune 1000 customers
- Committed innovators of supply chain ecosystems

About ACSIS Technology, Antares Vision Group

For over 25 years, the ACSIS technology has been at the forefront of supply chain innovation, delivering cutting-edge traceability solutions to Fortune 1000 companies including Bimbo, Cintas, DuPont, Coca-Cola, and Hershey. Powered by our cloud platform, our supply chain visibility solutions leverage AI, machine learning, analytics, and IoT to provide a complete real-time view of even the most complex supply chains across industries such as Chemicals, Manufacturing, Food & Beverage, and Life Sciences.
