

# Partner Collaboration

*Empower Your Global Supply Chain with AI-Driven Visibility and Real-Time Intelligence*

## **See Everything. Connect Everyone. Act Intelligently.**

Connect your partners. See every detail in real time.  
Turn collaboration into a competitive advantage.

### **YOUR CHALLENGES**

*Fragmented Visibility. Slower Decisions. Rising Risk.*

Today's global supply chains are more complex than ever. With manufacturing, packaging, and distribution outsourced across continents, visibility can vanish fast. When hundreds of partners operate in silos, quality issues go unnoticed, delays compound, and sustainability goals drift off track. Manual coordination through emails and spreadsheets simply can't keep up.

*You can't manage what you can't see.*

### **OUR SOLUTION**

*One Platform. Total Visibility. Smarter Collaboration.*

The Partner Collaboration Platform brings every supplier, contract manufacturer, logistics provider, and distributor into a single, cloud-based ecosystem. Fully integrated with your ERP, it delivers real-time visibility, AI-powered insights, and item-level traceability—so you can act on problems before they become disruptions. And with built-in Purchase Order Management, you can track, approve, and update every PO in one place.

 Ask. See. Decide. Just ask a question—"Which suppliers are delayed?"—and our AI assistant delivers instant answers. No reports. No waiting. Just clarity.

### **Connect Your Network**

Unify suppliers, logistics partners, and manufacturers into one collaborative ecosystem.

*"Because we can better manage our partners and capture global supply chain data with the ACSIS technology, our division is able to realize the full benefits of end-to-end visibility and control of the supply chain."*

— DuPont  
Protection Technologies

## See Everything in Real Time

Track open POs, WIP, inventory, and shipments on one intuitive dashboard.

## Collaborate smarter

Standardize partner updates, automate document exchange, and digitize workflows.

## Integrate seamlessly

Bi-directional integration with SAP, Oracle, and other ERP systems keeps data synchronized.

## Ensure Accuracy & Compliance

Automate validation, ensure item-level traceability, and maintain compliance-ready documentation.

## Control Every PO

Create, approve, and manage purchase orders with full lifecycle transparency.

## Leverage AI-Powered Insight

Use natural-language queries and predictive analytics to spot risks, improve performance, and act faster.

### The Result: A Smarter, Faster, More Resilient Supply Chain

Turn fragmented communication into connected intelligence. Move from reactive firefighting to proactive orchestration. And build a supply chain that collaborates—at the speed of AI.

## WHY US?

- 25+ years of industry experience
- Deep technology and domain expertise
- Proven experts in supply chain visibility
- Trusted partner of Fortune 1000 customers
- Committed innovators of supply chain ecosystems

### About ACSIS Technology, Antares Vision Group

For over 25 years, the ACSIS technology has been at the forefront of supply chain innovation, delivering cutting-edge traceability solutions to Fortune 1000 companies including Bimbo, Cintas, DuPont, Coca-Cola, and Hershey. Powered by our cloud platform, our supply chain visibility solutions leverage AI, machine learning, analytics, and IoT to provide a complete real-time view of even the most complex supply chains across industries such as Chemicals, Manufacturing, Food & Beverage, and Life Sciences.
